Supply Chain

Oil & Gas Supply Chain

Regina is located at the edge of the world-class Bakken Oil Formation, adjacent to the Shaunavon and Viking oil plays. Saskatchewan produces 512,000 barrels of oil a day, and much of it comes from southern Saskatchewan and the Bakken field.

Regina has specialized firms servicing the upstream, midstream and downstream industries providing:

- Contracting, pipeline & oilfield construction
- Custom machine and fabrication work
- Welding and plating services, and specialized pump jack service & parts
- Tubing, structural steel, sheet, plate and coil
- Custom fiberglass manufacturing and service
- Industrial transmissions, gearboxes
- Oilwell exploration products
- Technologies to clean up soil, air and groundwater contaminations
- Steel tank products
- Industrial pumps
- Scrubbers & separators
- Laboratory analysis/testing and research
- Spill trays and containment berms
- Communication and freight
- Multi-trade contractors
- Environmental and petroleum engineering services
- Applied research & specialized training
- Environmental assessment, remediation & reclamation services
- Community relations and corporate social responsibility expertise

Quick Facts

3,837 employed in the oil and gas industry and services

\$6.5 billion in sales

\$1.18 billion in GDP

"Saskatchewan is the largest conventional oil producer in Canada. We produce four hundred and sixty thousand barrels of oil per day in this province."
